NORTH CAROLINA SECTION
AMERICAN CHEMICAL SOCIETY

Vol. 10, No. 7

Raleigh, N.C.

March, 1980

"SURFACE SYNTHESIS, ANALYSIS, AND ELECTROCHEMICAL PROPERTIES OF MOLECULES ATTACHED TO ELECTRODES SURFACES"

- Speaker: Dr. Royce W. Murray
University of North Carolina
Chapel Hill
- Date: Tuesday, March 11, 1980
- Place: North Carolina State University
Raleigh, North Carolina
- Time: 5:30 Happy Hour
North Lounge, Second Floor
NCSU Student Union
(Directions enclosed)
- 6:30 *Dinner
South Lounge, Second Floor
NCSU Student Union
(Order from the cafeteria;
students-half price)
- 8:00 Lecture
South Lounge, Second Floor
NCSU Student Union

* Please make reservations by Friday, March 7, 1980.
Call Sherry Handfinger at 966-2296 in Chapel Hill,
Terry Laing at 684-2414 in Durham, or Linda Archer
at 737-2548 in Raleigh.

Educated at Birmingham Southern College and Northwestern University, ROYCE W. MURRAY has been since 1960 a member of the faculty of the University of North Carolina at Chapel Hill, where he is Professor and Director of Undergraduate Studies in the Department of Chemistry. His educational specialty is fundamental analytical chemistry, and his research is conducted in electrochemistry and surface chemistry, where he has published about 70 research papers.

* * *

The ways in which monolayers and multilayers of molecules can be synthetically attached to surfaces of electronic conductors will be described. An example monolayer surface structure is

This and related surface molecules are analytically characterized both spectroscopically with X-ray photoelectron spectroscopy and fluorescence and electrochemically by studying transfer reactions with the metal. The electrochemical properties and their applications in electrocatalysis will be discussed.

SURVEY FROM SECTION COUNCILORS

At the ACS National Meeting in Houston in March, the Society's Council will be considering several petitions to amend the Society's Constitution and Bylaws. As representatives from your section on the Council, we would like to know your views on these issues, and in voting on these petitions, try to reflect the feelings of the section. We therefore seek your guidance.

Attached is a tabulation of the petitions up for action and a brief description of what each petition would achieve. After reviewing the information provided, we would appreciate it if you would complete the survey form and return it to one of us at your earliest convenience. The meeting in Houston will begin on March 23, so we would be grateful for a reply well in advance of that date. Please feel free to add comments on a separate sheet. If you would like to know more about any of the petitions, please give a call to one of us.

Thank you for your help and cooperation.

MEETING-IN-MINIATURE - SECOND CALL FOR PAPERS

On the afternoon of Tuesday, April 22, 1980, the Meeting-in-Miniature will be held on the campus of the University of North Carolina-Chapel Hill. An application form is enclosed and the deadline for receiving titles is Friday, March 14, 1980. Please respond early to facilitate preparing the complete program for the April TarHelium.

Contributions are encouraged from both academic and nonacademic laboratories. Participation by industrial and government laboratories has been minimal; however, the Editor hopes that scientists from these laboratories will participate this year. The meeting is an excellent opportunity for the academic and nonacademic scientific communities to interact and to share ideas that might prove mutually interesting.

1. Balancing Geographic Regions.
[Bylaw V, Sec. 3(a)]

This proposed bylaw amendment would raise the allowable population differential among the six electoral regions of the ACS from 5% to 10%. The increasing southward and westward mobility of members in recent years has resulted in frequent redistricting. By providing for a 10% allowable deviation, frequent redistricting, which is costly and inconvenient, may be avoided.

IN FAVOR _____ OPPOSED _____ NO OPINION _____

2. Waiver of Initial Membership Dues for Student Affiliates.
[Bylaw I, Sec. 4]

This bylaw amendment would allow Student Affiliates to apply for Society membership for the period from July 1 (following graduation) through the year's end at no cost to the student. An experimental program conducted in recent years has shown that the free half-year membership is a viable membership promotion tool.

IN FAVOR _____ OPPOSED _____ NO OPINION _____

3. Allotment of Funds to Divisions.
[Constitution Article XIV, Sec. 3, New Bylaw VIII, Sec. 6]

The petition would provide for a yearly allotment of funds to divisions, similar to the present provision for allotment of funds to local sections. Divisions would receive a base and a per member allotment, both of which would be tied to the same cost of living indicator as ACS national dues. Further, divisions would receive additional funds for participating in and attracting registrants to national meetings.

IN FAVOR _____ OPPOSED _____ NO OPINION _____

4. Funds Apportionment to Local Sections.
[Bylaw VII, Sec. 8]

This petition would serve to have the base allotment to local sections tied to the same escalator as that used for national dues.

IN FAVOR _____ OPPOSED _____ NO OPINION _____

5. Yearly Allotments to Local Sections.
[Bylaw VII, Sec. 8(b)]

This petition would tie the per member allotment for local sections to the same escalator as national dues. At present no escalator (such as the one proposed for divisions) applies to the per member allotment for local sections. Urgent action on this issue has been requested so that sections can accurately forecast 1981 income, and so that similar provisions for local sections and divisions may be considered at the same meeting.

URGENT ACTION YES _____ NO _____

IN FAVOR _____ OPPOSED _____ NO OPINION _____

6. Designation of Immediate Past President as an Officer of the Society.
[Constitution Article VI, Sec. 1, 2(a), and 3(a)]

The Society President is elected for a three year term as President-elect, President, and as Past President. However, only the President-Elect and President are designated as National Officers of the Society. Petitioners believe it would enhance the prestige of the office of President to have this elected official designated as a Society officer for each of the three years he serves in the Presidential succession.

IN FAVOR _____ OPPOSED _____ NO OPINION _____

7. Change in Method for Calculating the Dues.
[Bylaw X, Sec. 3(a)]

The dues escalator was established to maintain dues-supported programs in the face of inflation. However, action by Council may cause no escalation or only partial escalation in a given year. Reduction of the escalator for any given year could result in a substantial increase the next year under the present system. By changing the method of calculation so that the escalator formula applies directly to dues for the previous year, such a compounded increase could be avoided.

IN FAVOR _____ OPPOSED _____ NO OPINION _____

8. Privileges of Affiliates.
[Bylaw II, Sec. 2, 4, and 5]

This bylaw amendment would allow affiliates (not ACS members) of local sections and divisions and National Affiliates (not ACS members) to vote for Division and Local Section officers and on certain other Division and Local Section matters.

IN FAVOR _____ OPPOSED _____ NO OPINION _____

9. Membership Application Procedures.
[Bylaw I, Sec. 3(d)]

This petition would eliminate the requirement that an applicant for ACS membership be nominated by two members of the Society. The petitioners note that it is impractical to check on or obtain any benefit from the nominators and the provision also hinders unnecessarily membership from some prospective applicants.

IN FAVOR _____ OPPOSED _____ NO OPINION _____

How to Obtain Abundant Clean Energy

by **Linda Baine McGown**, *California State University, Long Beach*
and **John O'M. Bockris**, *Texas A&M University*

Explaining why industrialized society's dependence on non-renewable energy sources can only lead to disaster, the authors of this crucial volume discuss in a clear and objective fashion what energy actually is, where we get it now, why present sources won't work for the future, and what alternatives are available. approx. 225 pp., illus., 1980, \$14.95

Application of Short-Term Bioassays in the Fractionation and Analysis of Complex Environmental Mixtures

edited by **Michael D. Waters, Stephen Nesnow, Joellen L. Huisingh, Shahbeg S. Sandhu**, and **Larry Claxton**, *U.S. Environmental Protection Agency, Research Triangle Park, North Carolina*

Reflecting advances in the field, this volume provides an excellent overview of the major short-term bioassay systems in current use and a review of methodologies for the collection and chemical analysis of environmental samples. *Environmental Science Research, Volume 15*. 602 pp., 1979, \$49.50

Hydrocarbons and Halogenated Hydrocarbons in the Aquatic Environment

edited by **B. K. Afghan**, *National Water Research Institute, Ontario, Canada*
and **D. Mackay**, *University of Toronto, Canada*

This book discusses the characterization, identification, and analysis of hydrocarbons and halogenated hydrocarbons in the aquatic environment. Advanced techniques for monitoring the distribution, incidence, biological effects, and environmental pathways of these pollutants are evaluated. *Environmental Science Research, Volume 16*. 602 pp., 1980, \$59.50

An Atlas of Spectral Interferences in ICP Spectroscopy

by **M. L. Parsons, Alan Forster**, and **Donn Anderson**, *Arizona State University*

This volume provides the information necessary to determine if a specific system will be subject to spectral interferences. An indispensable tool for inductively coupled plasma (ICP) analytical spectroscopists, this volume will be an aid in the choice of analysis line, the prevention of errors due to spectral overlap, and in the identification of sources of stray radiation. 654 pp., 1980, \$59.50

227 West 17th Street, New York, N.Y. 10011

APPLICATION
 Meeting-in-Miniature
 Tuesday, April 22, 1980
 Venable Hall
 University of North Carolina-Chapel Hill

Author(s): _____

Position(s): _____

Presented by: _____

Institution: _____

Title of Paper: _____

VWR WHERE MEETING SCIENTIFIC NEEDS IS A SCIENCE

Meeting the demands of modern science is challenging; so challenging that we've developed that challenge into a science. A science we take seriously.

Through years of service to the scientific community we've found what's needed and wanted.

This experience has challenged us to perfect a total concept supply system.

Starting with our extensive line of equipment and supplies, we offer products to fit your every need.

VWR chemical reagents, for instance, are manufactured by highly respected firms. Making and bottling reagents is what they do best. Delivering them is what we do best. VWR reagents are carefully selected to include those items most frequently ordered.

Our packaging is designed for maximum safety in handling and storage. Our delivery is designed to be free of bottlenecks.

Our recently introduced constant temperature line of ovens, baths, circulators and vacuum ovens offer truly advanced engineering and design. Exceptional quality at no increase in price.

In fact, we stock over 30,000 scientific items in local and regional warehouses near you.

Our system, people, computers and a nationwide warehouse network provides you with service second to none.

On the average we ship over 90% complete from stock and that's delivery.

The on-time delivery record we enjoy is possible because of the continued refinement of our system.

Our newest customer service, "on-line customer terminals," permits computer direct ordering from your office and now are being installed in facilities across the country.

TWO SECTION MEMBERS NAMED TO KENAN PROFESSORSHIPS

Dr. MARY ELLEN JONES, Department of Biochemistry, and Dr. ROYCE W. MURRAY, Department of Chemistry, were recently named to Kenan Professorships at the University of North Carolina-Chapel Hill. Congratulations from the section to these honored members.

DIRECTION TO MEETING AT NCSU

The NCSU Student Union is located at the intersection of Cates Dr. and Morrill Dr. next to Reynolds Coliseum and across the street from Carmichael Gymnasium. When approaching campus from the Beltline on Western Blvd., turn left onto Morrill Dr. at the Mission Valley Shopping Center. When approaching campus from the Beltline on Hillsborough St., turn right onto Dan Allen and left onto Cates, which is the second possible left turn after crossing under the railroad tracks. Park either in the gym or the coliseum parking lots. Avoid labeled residence parking and 24 hour reserved parking.

AREA SEMINARS

- Mar. 13 Dr. ROBERT A. STEVENS, University of California, Los Angeles, "Recent Studies on the Total Synthesis of Natural Products," 11:00 am, Room 308 Venable Hall, UNC-CH.
- 17 Dr. C. JUDSON KING, University of California, "Solvent Extraction for Removal of Organics from Water," 4:00 pm, 11 Riddick Engineering Lab, NCSU.
- 21 Dr. W. ROUSH, Massachusetts Institute of Technology, "Some Stereochemical Aspects of the Intramolecular Diels-Alder Reaction," 3:30 pm, Room 130 Gross Chemical Lab, Duke.
- 28 Dr. R. S. DRAGO, University of Illinois, Title to be announced, D. G. Hill Memorial Lecture, 3:30 pm, Room 130 Gross Chemical Lab, Duke.
- 31 Dr. R. BYRON BIRD, University of Wisconsin, "Molecular Explanations of the Flow Phenomena of Polymeric Liquids," 4:00 pm, 11 Riddick Engineering Lab, NCSU.
- Apr. 4 Dr. F. BIRKELHAUPT, Vrije University, Amsterdam, "p- π Hybridization with Phosphorous and Arsenic," 3:30 pm, Room 130 Gross Chemical Lab, Duke.
- 10 Dr. NORMAN SUTIN, Brookhaven National Laboratory, "Photo-Induced Electron Transfer Reactions," 11:00 am, Room 308 Venable Hall, UNC-CH.

TARHELIUM IS PUBLISHED BY THE NORTH CAROLINA SECTION OF THE AMERICAN CHEMICAL SOCIETY. THE VIEWS EXPRESSED HEREIN ARE NOT NECESSARILY THOSE OF THE SECTION, DIRECT ALL CORRESPONDENCE TO DR. WILLIAM L. SWITZER, EDITOR, C/O CHEMISTRY DEPARTMENT, NORTH CAROLINA STATE UNIVERSITY, RALEIGH, N. C. 27650.
